EXECUTIVE SUMMARY

Established in 2025, VibeVault Musica was created as a physical pop-up and online community music hub based in Alexandra. It was founded to create a vibrant space where people gather to experience their favorite music, explore the rich history of iconic artists, and connect over shared sounds.

MISSION STATEMENT

To bring people together through music by offering an interactive space where music lovers can explore gear, discover artist histories, and connect with their favorite tunes all under one roof.

VISION STATEMENT

To become Alexandra’s primary cultural and music hub, inspiring emerging talent and uniting the local community through shared musical discovery.

TARGET AUDIENCE

- Music enthusiasts.
- High school and university students.
- Beginner musicians and local artists residing in and around Alexandra and neighboring Johannesburg townships.
- Music lovers across South Africa using the website.

WEBSITE GOALS AND OBJECTIVES

SPECIFIC WEBSITE GOALS:

- Build an interactive digital platform that showcases instruments, vinyl, merch, and features artist history spotlights.
- Foster community engagement by creating a hub for local music events, listening sessions, and educational artist stories.
- Enable smooth customer interaction by offering browsing and direct order and inquiry pathways via WhatsApp.

KEY PERFORMANCE INDICATORS (KPI)

- Traffic: reach an average of 1,200 unique monthly visitors within the first 90 days of launch.
- Inquiries and Engagement: maintain a 3.5% conversion rate on cart inquiries and direct WhatsApp interactions.
- Community interaction: achieve an average time-on-site of over 2 minutes and 30 seconds per session as users explore artist stories and catalog items.

CURRENT WEBSITE ANALYSIS

- Strengths: As a newly launched startup in Alex, VibeVault Musica starts with a clean slate, allowing for a modern web application built directly for mobile-first community engagement.
- Weaknesses: The store currently lacks a centralized digital space, limiting its ability to reach music lovers outside the immediate physical neighborhood.
- Areas for improvement: implementing a web platform will bridge physical and digital spaces, enabling users to check event schedules, learn about music history, and order gear online.

CURRENT WEBSITE ANALYSIS

ESSENTIAL PAGES:

- **Homepage:** Features a dynamic hero banner (“your sound, your store”), featured starter gear, upcoming community listening sessions, and quick navigation buttons.
- **Shop:** A product grid categorized into instruments, accessories, audio, vinyl, and brand merch with category filter functions.
- **Artist hub and history:** An interactive section dedicated to exploring the histories, stories, and discographies of influential local and global artists.
- **About us:** Narrative detailing VibeVault’s Alex roots, its vision of bringing people together through music, and its community-driven ethos.
- **Contact:** Interactive contact form, embedded Alex location map, operating hours, and a direct WhatsApp button.

CURRENT WEBSITE ANALYSIS

COLOUR SCHEME:

PRIMARY:	SECONDARY:	ACCENT:
Deep black – provides a sleek backdrop.	Electric purple – represents creative energy and artistic expression.	Gold – draws eye attention to call-to-action buttons and featured artists' highlights.

TYPOGRAPHY:	LAYOUT & DESIGN:	USER EXPERIENCE (UX):	WIREFRAMES:
Aptos for clean, readable body text across mobile screens, paired with bold headings for an energetic brand aesthetic.	Clean grid layouts for products and artist features, structured spacing and touch-friendly buttons optimized for mobile interaction.	Fast loading over mobile data networks, simple top navigation bar, and high-contrast buttons for readability.	Low-fidelity wireframe sketches illustrating layout hierarchies for mobile and desktop.

TECHNICAL REQUIREMENTS:

Hosting & Domain:

- Domain name: vibevaultmusica.co.za (via a local South African registrar like Domains.co.za or Afro host.
- Hosting provider: GitHub Pages for free static hosting during development; scalable shared hosting for production.

Programming Languages and Tech Stack:

- HTML: Semantic markup for layout and accessibility.

Phase:	Key Milestone:	Target Completion
Phase 1	Requirement gathering and proposal finalization.	Week 1
Phase 2	UI/UX Wireframing and color scheme setup.	Week 2
Phase 3	Core HTML structure and CSS styling.	Week 3
Phase 4	JavaScript interactivity (Filters, search, dark mode)	Week 4
Phase 5	Testing, responsiveness review and GitHub deployment.	Week 5

BUDGET:

- Domain name registration: R400 / year
- Web hosting services: R900 / year
- Development and UI Design: R0 (in-house student assignment project)
- Maintenance and Domain renewals: R500 / year

  Total estimated budget: R1800
